# About Postgresqlcert

PostgreSQLCert is a dedicated PostgreSQL Training, Certification & Services division of SaiFirst (A leading Global Open Source and Security certification Training Provider). SaiFirst became the first company in 2005 to launch a structured PostgreSQL Training & Certification program and has successfully provided hands-on Instructor-led training to hundreds of clients world-wide.

PostgreSQLCert offers vendor Neutral certification programs so the client can get to learn about all available options in the market NOT just focused on one vendor who is just trying to promote their own products and services. PostgreSQLCert goal is provide the best possible non-bias training & certification possible to all its clients.

# Get an Edge, Get Certified

By becoming Certified from SaiFirst PostgreSQLCert provides effective PostgreSQL skills, confidence and client/employer's trust that you are a PostgreSQL Subject Matter Expert. Obtaining a PostgreSQL Certification from PostgreSQL Cert affirms a database professional's position as a knowledgeable and skilled asset with the required knowledge & skills in the PostgreSQL database technology.

SaiFirst certification programs sets the global standard for the commercial PostgreSQL professionals, and individuals certified under these programs fill a growing and critical need for PostgreSQL knowledge in the enterprise environments. World-class companies continuously examine business processes, employee performance and aggressively apply solutions to help them improve in training their employees to keep up with the technology and stay effective in an ever changing technology environment. PostgreSQLCert

can assist you in achieving and maintaining your competitive edge.

PostgreSQLCert offers Hands-on Instructor-led training & certification programs related to all core exam topics and offer certification programs and testing at both at their locations or exams can also be proctored in a convenient on-line format through a partner Exam testing site.

# Courses offered

1. Introduction to PostgreSQL
2. Certified PostgreSQL DBA (CPSDBA)
3. Certified PostgreSQL Developer (CPSDBD)
4. Certified PostgreSQL Database Migration Specialist (CPDMS)
5. Amazon RDS
6. Linux Essentials for PostgreSQL DBAs
7. Upgrading to PostgreSQL
8. Migration from Oracle to PostgreSQL
9. Export/Import & Streaming Replication
10. PostgreSQL Fundamentals
11. Replication, Backup & Disaster Recovery
12. Data warehousing & Partitioning
13. Certified PostgreSQL Database Security Expert

# PogtgreSQLCert
# Certified PostgreSQL Database Migration Specialist (CPDMS)

The Certified PostgreSQL Database Migration Specialist (CPDMS) course is an intensive, hands-on, enterprise-focused program designed to equip experienced database and platform professionals with end-to-end PostgreSQL migration mastery, covering strategy, architecture, execution, validation, optimization, and governance. Over three deep-dive days, participants learn to assess migration complexity and risk, select appropriate migration strategies, and confidently migrate schemas, data, procedural code, and applications from Oracle, SQL Server, and other legacy systems using vendor-neutral tools and real-world scenarios. The course emphasizes PostgreSQL internals, performance tuning, near-zero downtime approaches, automation with CI/CD pipelines, security, and production readiness, culminating in a capstone project that simulates a full enterprise migration, enabling participants to lead and deliver successful PostgreSQL migration initiatives
## Modules

- PostgreSQL Migration Landscape (Conceptual Foundation)
- Migration Methodologies & Strategies
- PostgreSQL Architecture for Migrators
- Migration Assessment & Discovery

# PogtgreSQLCert
# Certified PostgreSQL Database Migration Specialist (CPDMS)

- Migration Tooling Ecosystem (Vendor-Neutral)
- Oracle to PostgreSQL Migration – Deep Dive
- Oracle PL/SQL to PostgreSQL PL/pgSQL
- Oracle Data Migration Techniques
- SQL Server to PostgreSQL Migration
- T-SQL to PostgreSQL Conversion
- SQL Server Data Migration & Validation
- Legacy & Heterogeneous Database Migrations
- Application Migration & Compatibility
- Performance Tuning Post-Migration
- Validation, Testing & Cutover
- Migration Automation & CI/CD
- Security, Compliance & Governance
- CPDMS Capstone Migration Project

## Recommended experience -

- Hands-on working knowledge of SQL and experience with at least one enterprise RDBMS such as Oracle, SQL Server, or MySQL
- Basic understanding of Linux systems and networking fundamentals relevant to database environments Postgresql Migration Specialist…
- Prior experience in database administration, architecture, cloud/platform engineering, or modernization and migration projects is strongly recommended

## Target Audience

- Senior Database Administrators (Oracle, SQL Server, MySQL)
- Database Architects
- Cloud & Platform Engineers
- Migration Consultants
- SRE / DevOps Professionals
- Technical Leads managing database modernization initiatives
