PogtgreSQLCert
Certified PostgreSQL DBA (CPSDBA)

PostgreSQL is commonly known as Postgres and it is also open source database.
PostgreSQL is a powerful, open source object-relational database system.
A database administrator's (DBA) primary job is to ensure that data is available, protected from loss and corruption, and easily accessible as needed.
The PostgreSQL administration covers some of the most important PostgreSQL database server administration activities.

Modules
1.Introduction
2.System Architecture
3.Installation and Database Clusters
4.Creating and Managing Databases
5.Security
